# DO'S & DONT'S

## Do's

- Brush your hair using a specific boar bristle brush before shampooing your hair to ensure its tangle free.
- Secure the hair with one hand while detangling to avoid any pressure or tension on the extensions or natural hair.
- It is important that you use a sulfate free, protein free shampoo, conditioner, mask and leave-in treatment to ensure the longevity of the hair extensions.
- When shampooing your hair, work vertically not horizontally or in a circular motion, this will create less tangles and easier to manage.
- When applying conditioner, make sure to apply mid-shaft to ends, avoid applying conditioner to root area.
- Always use leave-in conditioner on the ends to keep the ends looking silky.
- We recommend you brush your hair at least twice a day, to keep your hair extensions from matting or tangling.
- Professional conditioning treatments and blowouts are recommended in between maintenance.
- Tie your hair into a loose side ponytail or braid when sleeping or during activities.
- Avoid tight updo's or ponytails for the first few days after hair extension application.
- When swimming always tie your hair in a ponytail or braid and apply leave-in conditioner to the hair to act as a barrier against harmful chlorine/salt water etc. Always shampoo immediately after swimming and detangle as normal.
- Always cover your hair when in direct sunlight for long periods of time.

## Dont's

- Don't wash hair for 48 hours after application.
- Don't go to bed with wet hair.
- Don't massage scalp when shampooing.
- Don't apply oils, alcohol, ethanol to bond/tape area.
- Don't attempt to remove hair extensions on your own, contact your salon professional.
- Don't leave your hair wet for longer periods of time without detangling as matting may occur.
- Don't allow bronzer, tanning oils, sun screen or products with tint in them to make contact with your hair extensions. Especially, if you have blonde hair, if you do so, you may experience slight color change.

## Additional Tips

Make sure to follow all home maintenance routines as directed. If you experience any challenges contact the salon immediately. Schedule your re-application appointment with your stylist ahead of time. Leaving the hair extensions on longer than recommended can cause painful matting in regrowth area.

When arranging your appointment to reuse your hair we advise booking another consultation so the stylist can review and assess your hair extensions to see if any new hair is required or any adjustments need to be considered.
